BOOK SYNOPSIS

Biodynamic methods are increasingly used by farmers, gardeners and winemakers. Dennis Klocek argues that, in order to use such methods effectively, the practitioner must undergo constant self-development. Based on numerous lectures, Klocek discusses the kind of inner development and understanding required to work with the elemental nature of the earth. His views are presented in a framework that includes alchemy, the classical four elements, Goethean observation, and the work of Rudolf Steiner. This is not a book of how-to techniques, but a conceptual guidebook to those looking to implement biodynamics at the deepest level.
